

Medical Service

Our approach for Medical Service for all people includes providing funds for the people to fill in their bills for the treatment of diseases. Under our Medical service help, people who are not financially-strong to have the required amount for the medical cure receive help. This is our idea of saving the people from an unnatural death, incurable damages of the body because of diseases, and incomplete treatment. We also help other institutions who are active in the same cause, and look further for an association with every social platform. Relfo is keen to take on the responsibility of every person who requires immediate funds for their medical treatment. Everyone in our nation has the right to live a disease-free, safe life. And we, make it pretty sure that no one is left out in the middle to get the rightful amount for the complete treatment of their disease.
