

Providing Opportunities

Employment

A large community of fresher graduates is still unemployed or in a wrong job. We make sure their talent isn't getting wasted by providing them with the best possible job opportunities to make a bright future. India has 65% young population. And every year we get millions of fresher graduates who are to face the competition of the real world and survive. But almost 60% of such employee-to-be students don't get the right job, and ultimately get lost in the dark surroundings of the wrong job, working endlessly without using their talent, knowledge, and vision. Also, it has a profession-relation side as well. Suppose an employee quits his/her job, and till they get the new one, there's no guarantee from where they will have the salary to live on. We provide them with their basic pay for up to 3 months as support for continuing with finding a new job.
